BUCKNELL UNIVERSITY. The Department of Chemistry at Bucknell University invites applications for a tenure-track faculty position (open-rank without tenure) in synthetic chemistry (broadly defined) to begin August 2014. Research interests could be in any area of synthetic chemistry and should be complementary to those of current faculty members (see http://www.bucknell.edu/Chemistry.xml). The successful candidate will teach introductory-level courses in organic or general chemistry and will have the opportunity to develop advanced courses in his/her area of specialty. A commitment to excellent teaching in a diverse environment is expected. Development of a strong research program that involves undergraduate and MS-level research students is also expected. The minimum qualification is a Ph.D. in chemistry or a closely related field (ABD considered) with postdoctoral experience preferred. Bucknell University, an Equal Opportunity Employer, believes that students learn best in a diverse, inclusive community and is therefore committed to academic excellence through diversity in its faculty, staff, and students. Thus, we seek candidates who are committed to Bucknell's efforts to create a climate that fosters the growth and development of a diverse student body. We welcome applications from members of groups that have been historically underrepresented in higher education. Applicants should submit a cover letter, curriculum vitae, description of research interests, statement of teaching interests, and the names and contact information for three references through jobs.bucknell.edu. Review of applications will begin on October 4th and continue until the position is filled. Candidates with questions about the position can contact Professor Eric Tillman at 570-577-3265 or etillman@bucknell.edu.
